

MOGENDI STEVEN MOSETI

Location: Nairobi, Kenya **Phone:** +254 728 732 204 **Email:** mosetisteven3@gmail.com

PROFESSIONAL SUMMARY

Highly motivated and technically skilled Systems Installation Professional and Entrepreneur with extensive, hands-on field experience in security systems. Successfully balanced academic pursuits with running a technical services venture (Steve Tech), gaining a reputation for delivering robust surveillance and networking solutions. Proven expertise in deploying top-tier hardware from Dahua and Hikvision brands. A disciplined, self-driven quick learner who recently completed secondary education and holds formal, state-recognized certification in CCTV infrastructure and network configurations.

CORE COMPETENCIES

Surveillance Systems: Advanced IP & Analog Camera Installation, Remote Viewing Integration, System Diagnostics.

Hardware Expertise: Dahua and Hikvision cameras, NVRs/DVRs, and Network Switches.

Network Infrastructure: Switch Configuration, LAN Routing, Cable Management (Cat5e/Cat6), Infrastructure Troubleshooting.

Business & Operations: Project Costing, Hardware Procurement, Client Relations, Time Management.

PROFESSIONAL EXPERIENCE

Founder & Lead Installer 2022 – Present

Steve Tech | Nairobi, Kenya (Part-Time & School Holidays)

- Established and operated a freelance technical service to fund academic expenses, managing end-to-end installation projects during school breaks.
- Designed and deployed high-quality security setups for residential and small commercial clients, exclusively utilizing reliable Dahua and Hikvision systems.
- Configured network switches, routers, and secure remote-viewing applications on client mobile devices and monitors.
- Managed inventory, client consultations, and hardware sourcing, ensuring projects were completed on time and within budget.

KEY PROJECTS

Residential Surveillance Rollouts Ongoing

- Completed multiple multi-camera holiday deployments across Nairobi, ensuring seamless remote security monitoring for homeowners using Hikvision/Dahua ecosystems.

Network Optimization & Clean-up Ongoing

- Re-configured overlapping local networks and messy cabling setups for clients, improving connectivity speeds and system reliability through proper switch management.
